PERSONALIZED GUIDE BOOKS  
TO YOUR HOROSCOPE ARCHETYPES

# WHAT EXACTLY DOES A SESSION INCLUDE

---

I look at your creative portfolio from the past, your astrology chart,  
& maybe also the astrology charts of your closest creative  
collaborators.

I prepare a packet like this one of what I see in you the creator  
before we take ~ 1 + hour where we talk, recorded if you like. You can  
ask me questions about anything, especially knowing that I am  
thinking about how to help you align with the larger creator's  
economy.

What am I creating here?

A Digital marketing agency with services to propel any kind of artist  
into as ambitious of creative career as they are looking for.

# THE TRADITIONAL ART & SCIENCE OF ASTROLOGY

---

Astrology is the study of time as it is mapped in the heavens and is a major aspect in all traditional medicine systems, but has been essentially factored out of study in modern academia by a constrained paradigm for science.

The paradigm for science that Western Academic institutions have adopted reflects a split between metaphysics and the material sciences enforced by church doctrines.

The debate is intense because true astrology is very subtle and particular, but its names, terms, and narratives have been misused and manipulated, supplying plenty of fodder for legitimate criticism.

# HOUSES

Just like what is built in the material world structures the flows of subtler bio-energies, so too do our instincts set up at birth by our orientation on the earth to the heavens, structure our relationships to the energies of the planets and houses.

1-6

## Personal Houses

- ▲ sense of self, core personality traits, & immediate physical experience
- ▲ core creative impulses & the physical/social framework we create from

7-12

## Collective Houses

- ▲ broader societal concerns & the connections with affect them, including partnerships & endowments of all kinds
- ▲ standards & goals for education, friendships, & spiritual community

# SYNASTRY AND MATCHMAKING

Just as your own chart shows a map of the energies as they imprinted you at your birth, the chart of a lover or a close-connection of any kind will reveal what kinds of energies live in them & play off you.

Any two or more people who are creating anything together can learn a lot about their relationship dynamics by looking closely at a synastry chart.

As our organizational resources expand, we will build a database of more people's astrological information for matchmaking purposes.
